

# FLUPPETE

## CAMPERVERAN INTERIORS

project type: academic partnership with Trigano Spa

end date: june 2022

duration: 4 months

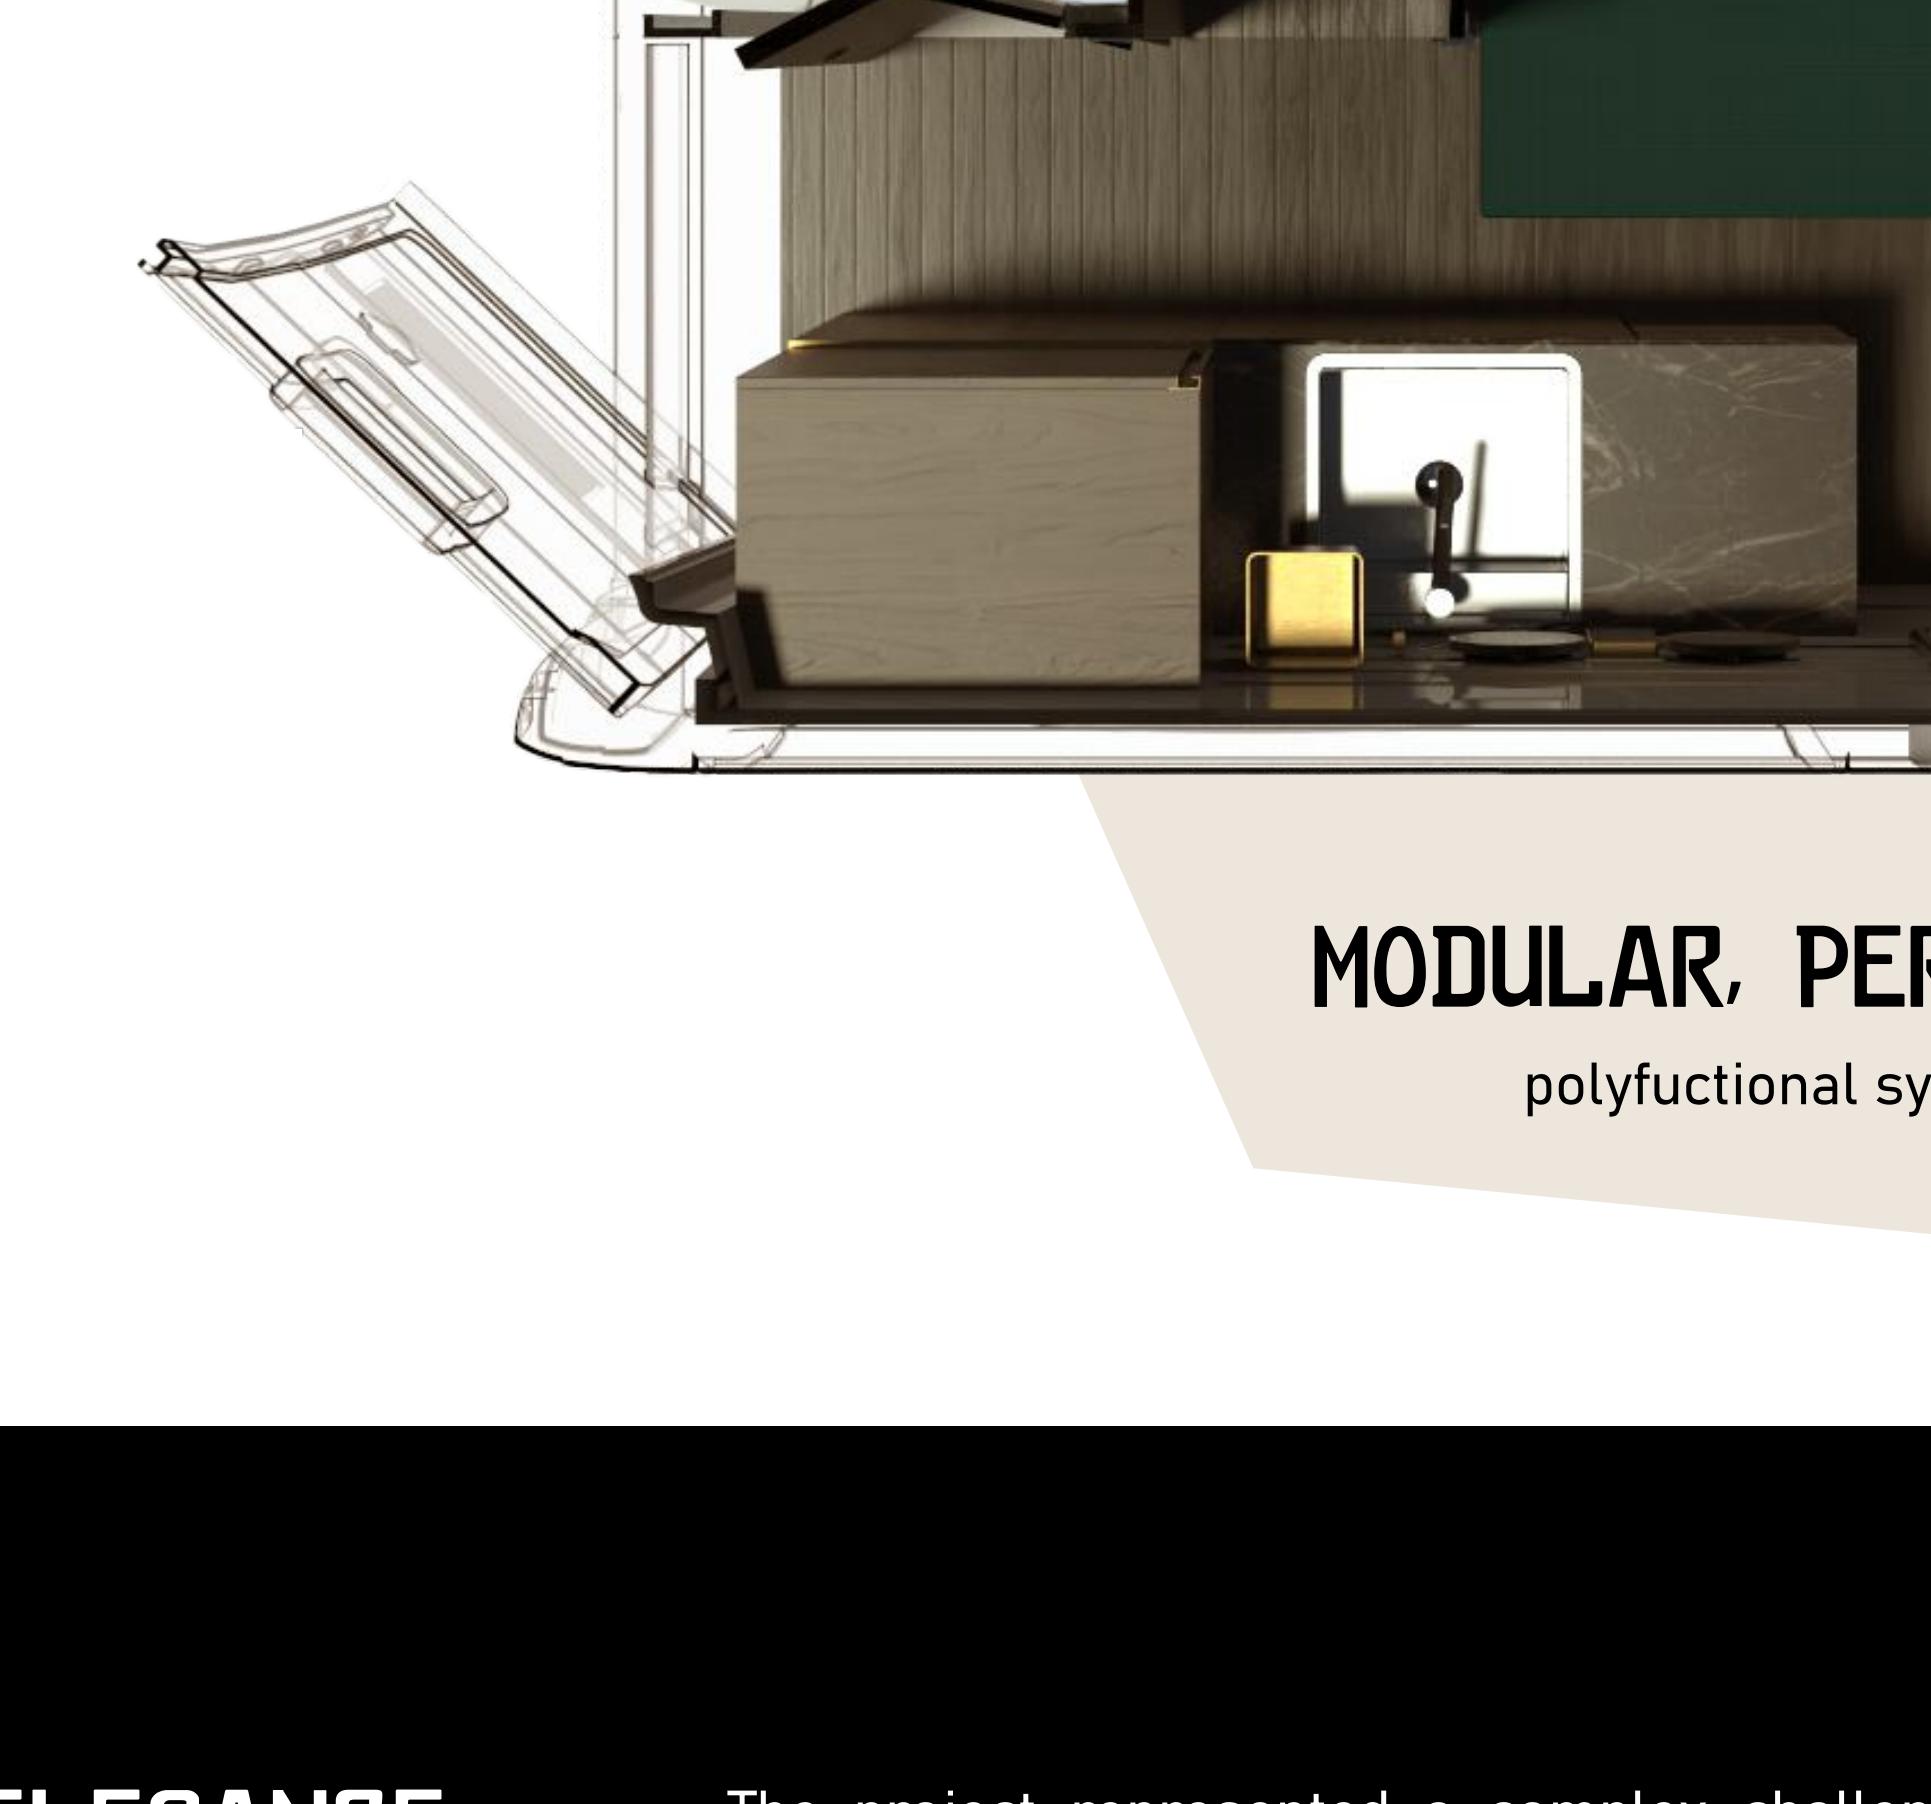

teammates: S. Boni, E. Teruzzi, M. Pasquini

Fluppete is a resourceful proposal for a new generation of long-term usage campervans, based on the FIAT's 5.9m Ducato minivan. The concept, rooted in vandwellers' habits, aims to create a completely flexible and customizable environment that could adapt and evolve to better answer the user's needs; the outcome is a dynamic layout that can be mechanically arranged with very few operations, resulting in a lively, young solution.

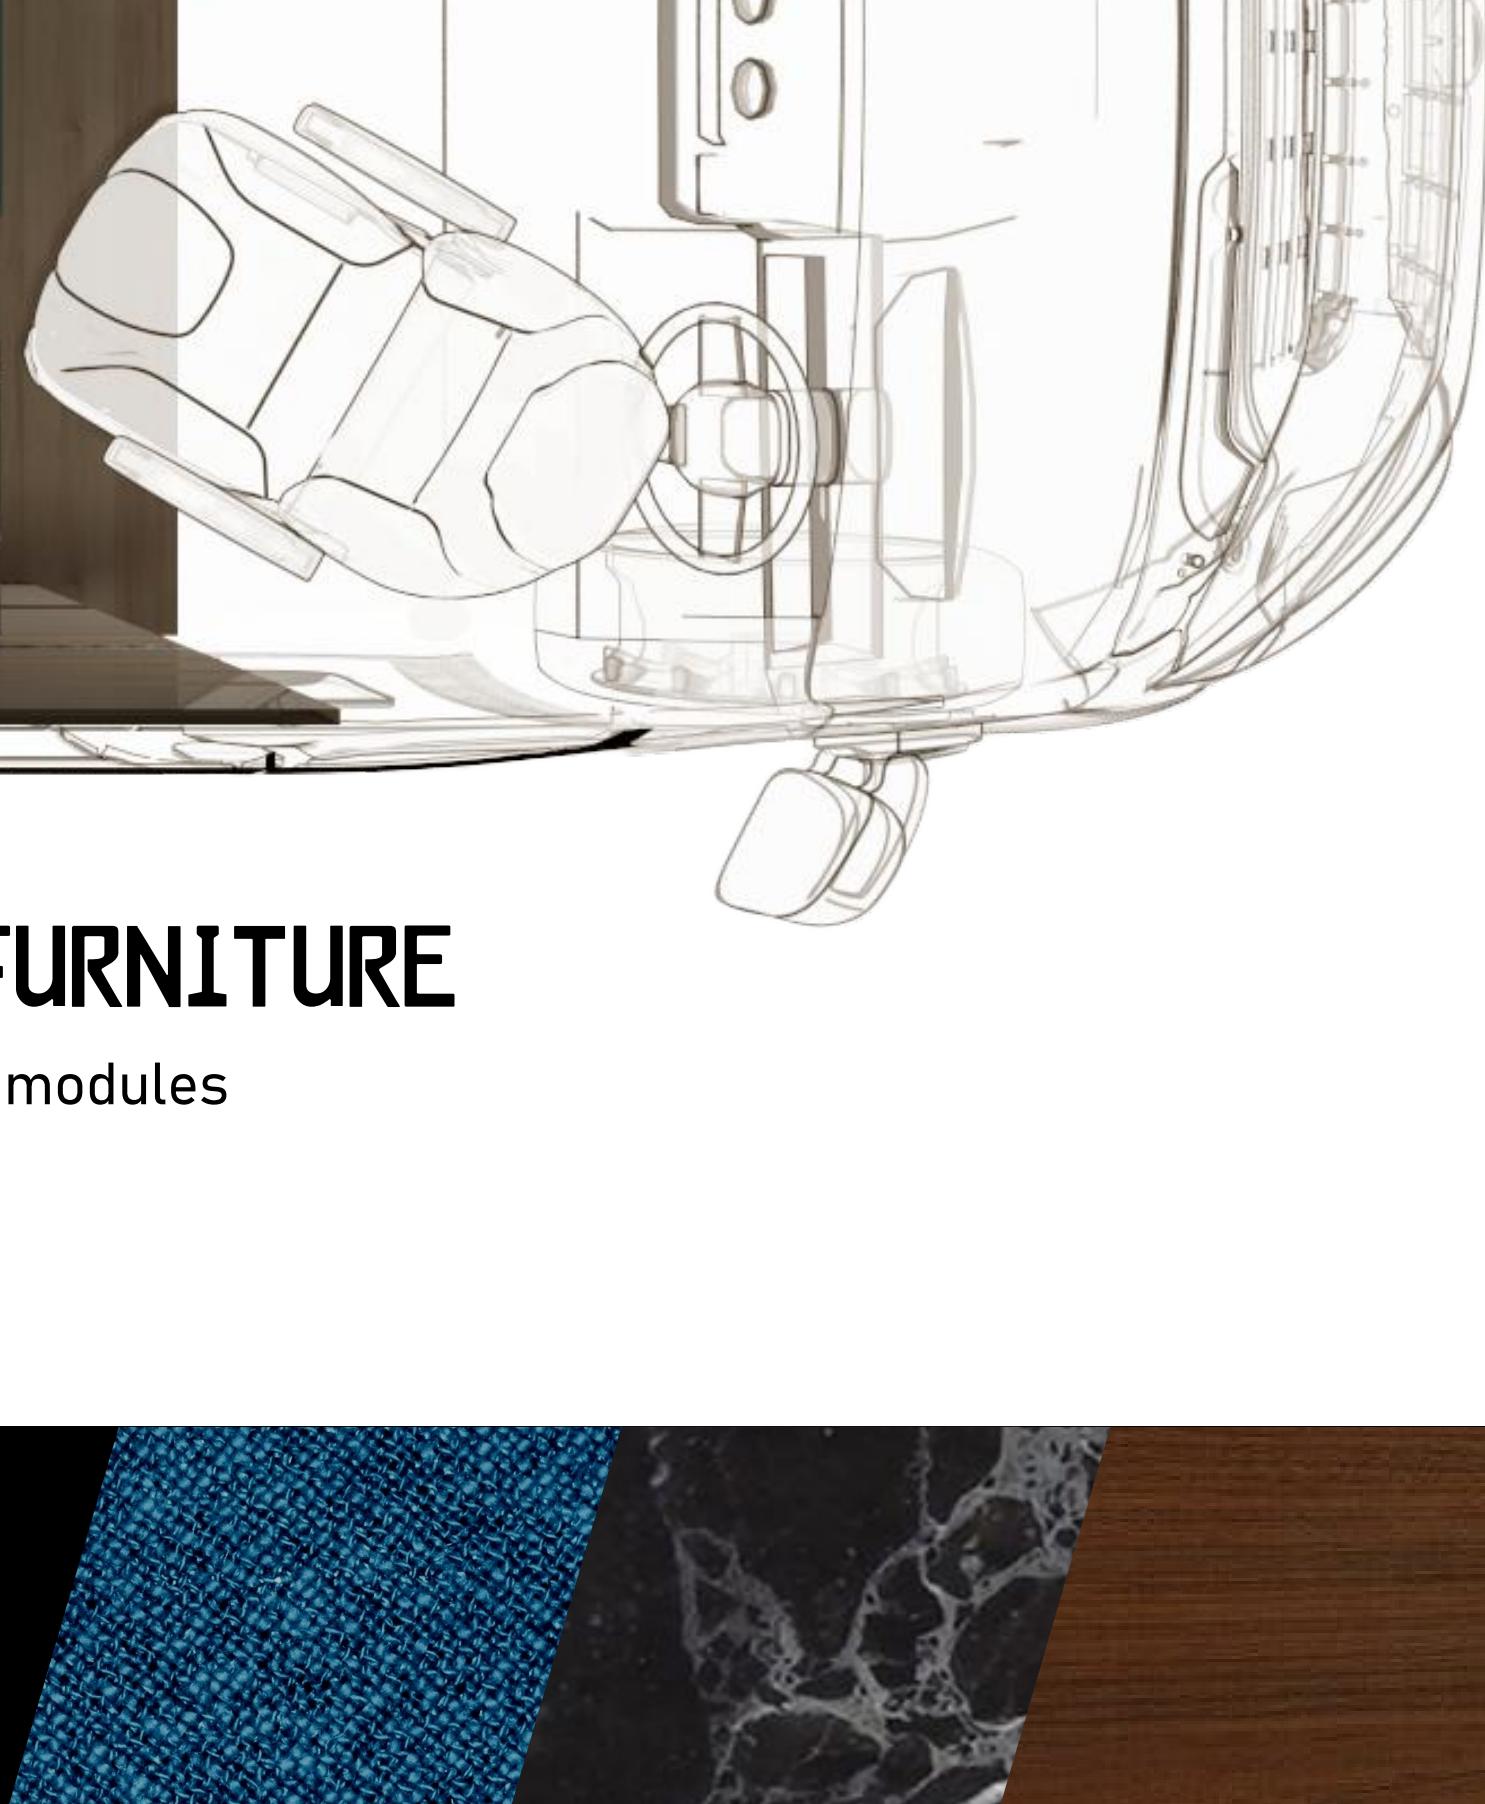

### ESSENTIALITY WITH NO CONSTRAINTS

extendible toilet with pop-out shower to maximise space

### COMFORT IN A NEW WAY

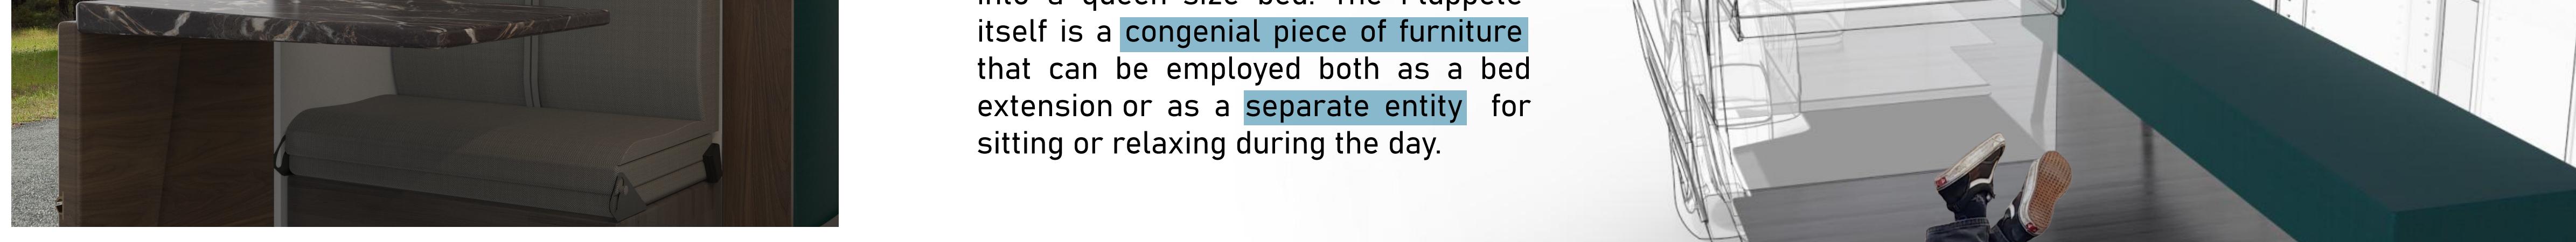

### MODULAR, PERSONALIZABLE FURNITURE

polyfunctional system based on wall mounted modules

### ELEGANCE ADAPTABILITY CUSTOMIZATION

The project represented a complex challenge: the goal was to merge the endless possibilities of a transformable space with the taste and prestige of the Trigano brand – an ambition that is reflected in the choice of the materials used.

### FLUPPETE BENCH EXTENSION FOR A DISAPPEARING BED

The redesigned of the homologated

back seats made them transformable

into a queen-size bed. The Fluppete

itself is a congenial piece of furniture

that can be employed both as a bed

extension or as a separate entity

for sitting or relaxing during the day.

### SPACE EFFICIENT BATHROOM

Mounting a pop-out shower on the

back door not only creates an

alternative entrance but also takes

advantage of the tailgate volume to

largely increase the bathroom's total

area, which in other models is usually

underrepresented.
